PROFESSIONAL SUMMARY

AI & Backend Developer with hands-on experience in developing AI-powered applications using Python, FastAPI, and Large Language Models (LLMs). Experienced in building scalable REST APIs, document-based Retrieval-Augmented Generation (RAG) workflows, AI chatbots, real-time AI response streaming using WebSockets, and deploying backend applications. Passionate about developing production-ready, scalable, and maintainable AI solutions.

SKILLS

Programming Languages: Python, Java, C, C++, JavaScript, SQL

Frameworks: FastAPI, Flask, LangChain

AI/ML: Machine Learning, NLP, Generative AI, Retrieval-Augmented Generation (RAG), Prompt Engineering

LLMs: OpenAI GPT, Gemini, Claude, Mistral, Hugging Face Transformers

Databases: Supabase, PostgreSQL, MySQL

Cloud & Version Control: Hugging Face Spaces, Git, GitHub

Tools: Postman, Swagger, Jupyter Notebook, VS Code

Soft Skills: Problem Solving, Teamwork, Adaptability, Time Management

WORK EXPERIENCE

AI Developer | We3Vision Private Limited

Jan 2026 – Present | Surat, India

- Contributed to the development of Webugmate, an AI-powered enterprise chatbot platform for knowledge retrieval and workplace productivity.
- Designed and implemented scalable backend services and REST APIs using Python and FastAPI.
- Developed document-based Retrieval-Augmented Generation (RAG) workflows using enterprise documents and embeddings.
- Implemented real-time AI response streaming using WebSockets.
- Designed a plug-and-play multi-LLM architecture supporting dynamic provider and model switching.
- Collaborated with cross-functional teams following Agile development practices.

PROJECTS

Webugmate – AI-Powered Enterprise Chatbot Platform

Technologies: Python, FastAPI, WebSockets, Supabase, LLM Integration

- Enterprise AI platform designed for workplace collaboration and knowledge management.
- Supports document-based Retrieval-Augmented Generation (RAG), real-time AI streaming, and role-based access control (RBAC).
- Features a modular plug-and-play architecture for seamless integration and switching of multiple LLM providers and models.
- Built with a scalable backend architecture to support enterprise AI applications.

ResumeRadar – Job-Ready Resume AI Mentor

Technologies: Python, Flask, Google Gemini API

- Developed an AI-powered web application that analyzes resumes against job descriptions and generates ATS-friendly improvement recommendations.
- Integrated Google Gemini API to identify skill gaps and provide personalized resume enhancement suggestions.
- Collaborated with a team to design, develop, and test the application for the GDG Solution Challenge 2025.

SmartShipAI – Ship Fuel Consumption & CO₂ Emissions Analysis

Technologies: Python, Flask, Scikit-learn, NumPy, Google Gemini API, Groq API

- Developed a machine learning application to predict ship fuel consumption and CO₂ emissions using predictive analytics.
- Applied data preprocessing and machine learning techniques to analyze fuel efficiency and environmental impact.
- Built and deployed an interactive web application for real-time prediction and visualization.

EDUCATION

B.E. in Computer Engineering

C.K. Pithawala College of Engineering & Technology (GTU)

Sep 2022 – May 2026 | CGPA: 8.33

CERTIFICATIONS

- **Hack2Skill GDG on Campus Solution Challenge 2025** – Developed ResumeRadar as part of Team Insight Strikers.
- **ByteVerse Hackathon** – Developed a Handwritten Digit Recognition system using machine learning.
- **Infosys Springboard** – Certified in Basics of Python, Python for Data Science, and Data Mining with Python.
